

CPSIA Compliance

The Promotions Dept. has developed a comprehensive program to ensure products manufactured for our company comply with the Consumer Product Safety Improvement Act (CPSIA) of 2008. The Promotions Dept. CPSIA program includes testing for all CPSC-regulated standards applicable to our products, including lead content and lead in substrates, products containing certain phthalates and lead in paint and surface coatings.

Certain sections of the law do pertain to the Promotional Products Industry, specifically to those items classified as Children's Products. All the items found in The Promotions Dept. portfolio are designed to meet applicable Federal and State regulations. The Promotions Dept. has undertaken testing campaigns to ensure that certain products that may appeal to children meet CPSIA requirements.

The Promotions Dept. utilizes CPSC accredited third party testing labs. These testing laboratories issue certificates to substantiate that the tested products meet all applicable CPSIA requirements. These test reports can be found at www.thepromotionsdept.com. The Promotions Dept. also maintains Children's Products Certificate (CPC) forms for all products in our line that may appeal to children. These forms can also be found at www.thepromotionsdept.com.

Depending on what is reasonably practical, The Promotions Dept. satisfies the tracking label requirement by providing compliant tracking information on either individual item labeling or more commonly on packaging.
